ParagonCare

Paragon Care has emerged as a leading provider of equipment, devices and consumables to the healthcare market.

Paragon Care is an ASX listed Company (PGC) which has progressively acquired businesses in the healthcare sector.

Paragon Care has strategically acquired reputable companies, each one a leading provider of innovative healthcare equipment, devices and consumables. Through these acquisitions we have now established offices and warehouses across Australia and New Zealand, with head office based in the eastern suburbs of Melbourne.

Our companies are well known throughout the healthcare industry and are now growing as one organisation, offering a peerless range of high-quality products and services. Familiar people within these businesses have given strength to the synergies that flow from the Paragon Care Group of Companies.

Many of our ranges are sourced internationally and include products from USA, Germany, Denmark, Netherlands, United Kingdom and Asia.

With our experience and in-house resources, we are well positioned to provide specialised design development and custom manufacturing.

Our extensive range of products and services enables us to be major providers for large healthcare projects with the scope to provide consultative services to Project Planners, Architects and Construction Contractors.

PATIENT TREATMENT STRETCHERS

Hausted Stretchers

462EMCST

Hausted Horizon Stretcher — Hydraulic

The Horizon Hydraulic Stretchers are designed to provide versatility, lasting and consistent performance, and ease of use. These easy-to-clean units can support a patient during induction, transport, treatment, and recovery functions, avoiding unnecessary patient transfers to other equipment.

Height Range	56 – 88cm
Overall Length	210cm
Patient Surface Dimensions	64 x 193cm
Castors	20cm central lock
Max Weight Capacity	227kg

462APAST

Hausted Horizon Airglide Stretcher — Hydraulic

This versatile, lightweight unit can be used in every phase of care from patient transport and clinical procedures to recovery. The Stretcher features full length stainless steel rails that tuck completely out of the way to eliminate patient transfer gaps.

Height Range	56 – 88cm
Patient Surface Dimensions	76 x 193cm
Overall Length	208cm
Castors	20cm central lock
Max Weight Capacity	227kg

4D2DPAST

Hausted Horizon Airglide Stretcher — Electric

A fully-powered bariatric stretcher with pendant control and caregiver lockout control module. The Powered unit is designed with head, foot, hi-low and Trendelenburg/Reverse Trendelenburg as standard features as well as a full 81 cm wide patient surface with full length siderails

Includes an emergency backrest release lever located conveniently on both sides of unit, which allows for quick positioning.

Height Range	56.5 – 75cm
Patient Surface Width	81cm
Patient Surface Dimensions	81 x 196cm
Castors	20cm central lock
Max Weight Capacity	327kg

493RPXST

Flouro Track Stretcher

Hausted Fluoro-Track Fluoroscopy Capable Stretchers are intended for fluoroscopy, endoscopy, pain therapy, or surgical procedures, as well as transport of patients in healthcare facilities.

The hourglass shaped base with trimmed sides creates an excellent window for C-arm access, while the full length radiolucent patient surface enables a broadrange of imaging capability. To ensure patient comfort, the patient surface can be adjusted through a variable range of positions.

Height Range	58 – 91cm
Patient Surface Dimensions	64 x 193cm
Overall Length	204cm
Castors	20cm central lock
Max Weight Capacity	227kg

468XRYST

Hausted Horizon X-Ray Trauma Stretcher

The X-Ray Trauma Stretcher is intended for transport, treatment and recovery of patients' intra-and interdepartmentally in healthcare facilities. Its design allows for unparalleled full length X-ray capabilities, the security of a treatment table, and mobility of a stretcher.

Height Range	66 – 89cm
Patient Surface Dimensions	72.4 x 185.4cm
Overall Length	210.8cm
Castors	20cm central lock
Max Weight Capacity	227kg

462EMCST

Hausted Horizon Youth Stretcher

The Hausted Youth Care Stretcher is a full size stretcher for young children and adolescents with the security of vertical rails. This unit provides the safety and security of 360° patient protection as well as 360° patient access when needed.

Height Range	72 – 94cm
Patient Surface Dimensions	63.5 x 193cm
Overall Length	211cm
Max Weight Capacity	227kg
Castors	20cm central lock

58DEYEST

Hausted Eye Surgical Stretcher — Hydraulic

The Hausted Surgi-Stretcher is a multi-position stretcher intended for treatment, transport or recovery of a patient. With the uniquely designed articulating head section, this unit can be used for specialty procedures which require precision head positioning.

Models in this series provide specialised surgical functions of head positioning for ophthalmology, plastic surgery or ENT procedures.

Height Range	56 – 76cm
Patient Surface Dimensions	62.2 x 207cm
Overall Length	225cm
Castors	20cm central lock
Max Weight Capacity	227kg

ESDEYEST

Hausted Eye Surgical Stretcher — Electric

The Hausted Surgi Chair is a multi-position chair and stretcher intended for treatment, transport, or recovery of a patient.

Height positioning, as well as backrest and leg section adjustment, is electric powered and is activated with a hand held control. This unit adjusts easily from sitting to supine, and provides a stable work surface during patient treatment.

Height Range	56.5 – 82.5cm
Patient Surface Length	191cm
Castors	13cm central lock and steer
Max Weight Capacity	147.5kg

SPECIALTY PROCEDURE CHAIRS

EPD250ST

Hausted All Purpose Chair

The Horizon Hydraulic Stretchers are designed to provide versatility, lasting and consistent performance, and ease of use. These easy-to-clean units can support a patient during induction, transport, treatment, and recovery functions, avoiding unnecessary patient transfers to other equipment.

Height Range	57 – 83cm
Trendelenburgs	6°
Overall Length	191cm
Castors	20cm central lock and steer
Max Weight Capacity	227kg

VIC429ST

Video Fluoroscopy Chair

The Hausted Video Imaging Chair features a specially designed backrest and rotating seat to help accommodate the space confinements of large imaging equipment while providing maximum patient comfort and safety.

The radiolucent backrest provides a clear, unobstructed site for imaging. The chair is designed specifically for Modified Barium Swallow Studies. This unit adjusts easily from sitting to supine and provides a stable work surface during patient treatment.

Height Range	60 – 80cm
Patient Surface Width	56cm
Castors	13cm central lock and steer
Max Weight Capacity	147.5kg

MBC000ST

Mammography Chair

The Mammography/Biopsy Chair is ideal for use as a procedural chair or treatment table during mammography/biopsy procedures.

The shortened base is easy to maneuver in small rooms with large imaging equipment. The backrest adjusts to a full upright position of 90° to facilitate mammography procedures. This unit adjusts easily from sitting to supine and provides a stable work surface during patient treatment.

Height Range	60 – 80cm
Overall Length (Supine)	190cm
Wheel Base	63 x 55cm
Max Weight Capacity	147.5kg

EXAMINATION & TREATMENT COUCHES

Acero Examination Couches

Acero examination couches offer a very cost effective solution to any consultation facility. The all electric operation not only provides ease of use, but is ergonomic and OH&S friendly.

A generous low height, allows for easy ingress by patients and the couch can be effortlessly raised to a comfortable height for the care giver.

Both the two and three section models are ideal for general examination, assessments and clinical treatment, yet the three section model is very helpful in the management of lower limb problems such as vascular circulation.

The couches are fitted with 100 mm castors, fully braked that enables transportation where necessary. Twin support frame design enables excellent stability and weight distribution. Unique base design gives clear access for patient lifters and over bed tables.

Seers Range Couches

SM8563

Gynaecology Couch

Designed with an adjustable back rest with positive angle of 0–75° and excellent height range of 49–104cm, the Seers Gynaecology Couch provides solutions for patient examination and treatment procedures.

This model has a safe working load and lifting capacity of 240kgs and can be configured with a choice of retractable wheel design with adjustable foot for uneven floors or with large wheel mobile base design.

SM8583D

Deluxe Gynaecology Couch

Designed for colposcopy and general gynaecology procedures, the deluxe models feature electric positioning for height, backrest angle and tilt position.

They are supplied with a special set of accessories which include a matching operators chair, base frame shrouding, choice of seat extension, leg supports and matching head cushion, side support loops, debris tray and paper roll holder.

SM0575

Multi Couch

With 90 degree dropping extendable foot sections, this Multi Discipline Couch provides simple seating for a range of treatments & examinations. Added to this, the small foot print of the base allows this chair to be used in confined spaces.

These products lend themselves to use in such areas as chiropody, lymphodema, leg ulcer clinics, orthopaedic casting, phlebotomy as well as being ideal for GP surgeries and Health Centres

SM9576P

Phlebotomy Couch

A specialist couch designed to provide a comfortable and easy to mount seat position for the patient with variable height elevation and fully adjustable arm supports for phlebotomy procedures.

This model has a safe working load and lifting capacity of 240kgs and a height range of 50–102cm. Designed with compact frame and retractable wheel system as well as an adjustable foot for stability on uneven surfaces. Also complete with purpose made precision bearings on all pivot points.

SM9696
Ultrasound Couch

Providing smooth electric positioning of height, tilt and backrest angle, these couches feature a compact base frame and are ideal for both supine and seated procedures. The deluxe model includes the base frame cover and matching operators chair.

This model has a safe working load and lifting capacity of 240kgs and a height range of 52–106cm. Designed with compact frame and retractable wheel system as well as an adjustable foot for stability on uneven surfaces. Also complete with purpose made precision bearings on all pivot points.

SM3590
Echocardiograph Couch

Designed specifically for Echocardiography, this couch has electric operation of height, tilt and backrest angle. The backrest has a cut-away design for improved application of the transducer during scanning procedures and a specially designed stool for the clinician is also provided.

The couch is also supplied with an integral footrest for the clinician, as well as a patient hand-grip and head cushion for the patients comfort and security

This model has a safe working load and lifting capacity of 240kgs and a height range of 50–103cm.

SM4642
2 Section Bariatric Couch

These products meet the increasing requirements for providing examination couches with the capability of supporting extremely heavy patients. All these models have a safe working load and lifting capacity, from minimum height, of 325kgs.

Adjustable angle electric backrest operation from horizontal to +80° positive.

SM3573
3 Section Bariatric Couch

These products meet the increasing requirements for providing examination couches with the capability of supporting extremely heavy patients. All these models have a safe working load and lifting capacity, from minimum height, of 325kgs.

Adjustable angle head/foot section from -25° to +75° positive.

ST3569

3 Section Therapy Couch

Incorporating both an adjustable angle backrest and a choice of head section designs “Basic” or “Plus” model with adjustable height armrests, these models are very versatile and suitable for a wide range of manual therapy techniques and various patient examination procedures.

This model has a safe working load and lifting capacity of 240kgs and a height range of 45–98cm. Designed with purpose made precision bearings on all pivot points as well as an adjustable foot for stability on uneven surfaces.

ST4562

Bobath Therapy Couch

By tradition, Bobath treatment techniques require a suitably wide treatment surface with a safe and capable lifting capacity for both patient and therapist. The Bobath Therapy range of couches has more than achieved this with a choice of 2 sizes and a higher than standard safe working load of 250kg.

ST5561

Mat Therapy Table

The Mat Therapy Tables are almost identical to the Bobath models in terms of specification and features but without the backrest facility. The single section top design provides a large and stable variable height support surface for a wide range of exercises and Bobath rehabilitation procedures.

This model has a safe working load and lifting capacity of 250kg and a height range of 46–100cm. Designed with purpose made precision bearings on all pivot points as well as an adjustable foot for stability on uneven surfaces.

ST7641DL

Tilt Table with Divided Leg

These excellent Tilt Tables have been designed to meet the requirements of a wide range of applications for rehabilitation, assessment, and examination procedures. Available with the option of “divided leg design” which provides individual harness security for the lower limbs.

This model has a safe working load and lifting capacity of 225kg and a height range of 47–101cm.
