We begin each project with a detailed scoping phase which anchors the project priorities, helping us to define the desired outcomes.

We learn about the projects needs and motivations of stakeholders, establish the project boundaries and objectives, and begin to map the opportunities. Critically, we don’t lock clients down to specifications and fixed ideas; we keep the options open.

- Industries insights and impacts
- Define project vision and objective
- Identify requirements

The crucial point is that trialling gives procurer’s confidence. Confidence in their purchase and confidence in their concept. We want you to see how your product will work before buying.

- We will demonstrate the start to finish process
- The confidence to navigate all products
- Ability to work to, and maintain products
- We include the customer in the testing process
Global manufacturers from USA, Germany, Netherlands, and the UK, help us to produce and source our high-quality aged care equipment internationally. Additionally, one of our divisions is a Melbourne based high quality manufacturer, who completes our product offering by manufacturing unique stainless steel products, including shower chairs, instrument and equipment trolleys, various medical equipment and more.

With the help of our extensive range of aged care equipment and supply solutions, we proudly contribute to the planning of major aged care projects:

- Beds and Mattresses
- Furniture
- Materials Handling
- 60 40 Materials Management System
- Patient Handling
- Seating & Mobility
- Shower Chairs - Mobile
- Utility Carts
- Wire Shelving Systems

Our highly skilled team of professionals provide a consultative service to project planners, architects, as well as construction contractors.

We also maintain a fully integrated Service and Maintenance Department that is well established ensuring all projects are delivered and installed to the highest degree of satisfaction for all stakeholders.

- Site visits
- Planned logistics
- Dedicated Paragon Care installation and commissioning team
- Dedicated Paragon Care in-service and training team

Paragon Care prides itself on maintaining satisfied clients — the job is never complete until all stakeholders requirements have been met and exceeded. We see ourselves as partners in your business — your success and satisfaction is vital to us.

Reviewing our services from initial scoping of the project to the last product installed is something we take pride in.

- Review team
- Key stakeholder analysis
- Feedback
- Ongoing contact for service and future equipment requirements
Paragon Care Aged Care committed to flexible solutions that are resident, family and caregiver focused.

AGED CARE. COVERED.

When residents transition to an aged care facility it’s important that they receive the best care but also feel that they are in a home environment with furnishings that are aesthetically pleasing, but not clinically compromising.

With a range of models and finish options to select from, our Aged Care range is a stylish solution to complement any existing decor to achieve a warm and comforting atmosphere for the residents.

Pressure Care Mattresses

The Paragon Care range of Static Mattresses are manufactured from high grade foam that contours to the body effectively providing maximum pressure redistribution, skin integrity and patient comfort. The mattress covers are designed to be waterproof and provide comfort, durability and offer superior infection control.

The Active Pressure Relieving Mattress Systems are recognised as market leading providers of specialist pressure relieving and pressure reducing capabilities.

---

3 Core Pressure Care Mattress
IONAPC150

The 3-Core Mattress offers a high level of pressure care suitable for a wide range of current hospital and nursing home beds. This mattress is often recommended by therapists for residents requiring extended bed stay periods (pressure care).

Features a one piece waterproof cover for superior infection control. The mattress cover is 2-way stretch carrflex with optional mediflex base.

Mattress size can be custom built to suit your needs including king single and larger bed sizes.

---

Permaflex Advance Pressure Reducing Mattress
PARKAPL100PSF

The Permaflex Advance mattress is fully encased in an advanced outer cover material; constructed of a denser interlock knit polyurethane fabric, it provides greater weld strength and improved durability during general use. These features combine to enhance the covers resistance to fluid ingress and reduce its susceptibility to damage.

The Permaflex Advance mattress provides a cost effective solution to pressure ulcer management, whilst still delivering the same excellent performance and reliability as other mattresses in the Permaflex range.
 Elite Mattress Replacement System  
**PARKPA550M**

The Elite Mattress Replacement System provides a cost effective solution for both the prevention and treatment of pressure ulcers, suitable for patients up to Very High Risk of developing pressure ulcers.

Easy to install and operate, the Elite is suitable for both hospital and homecare environments. With an underlayer of fully encased visco-elastic foam for added support, the Elite mattress combines alternating therapy with optimum user comfort.

 Eclipse II Mattress Overlay System  
**PARKPA5500M**

The Eclipse II Mattress Overlay System is a highly efficient, yet cost effective alternating system for both the prevention and treatment of pressure ulcers. The Eclipse II mattress overlay is suitable for those patients who are at Medium to High Risk of developing pressure ulcers.

With clinical and cost effectiveness paramount, the Eclipse II mattress overlay is both easy to install and operate, and along with the CPR facility, is suitable for both hospital and homecare environments.

 Prelude Mattress Overlay System  
**PARKPA3500**

The Prelude Mattress Overlay System offers a cost effective, pressure-relieving surface ideally suited to the homecare environment.

Suitable for both the prevention of treatment of pressure ulcers, the Prelude mattress overlay is ideal for patients at Low to Medium risk of developing pressure ulcers.
