

Sigmoidoscope Bellows

Disposable

Are you having difficulty cleaning the sigmoidoscope bellows?

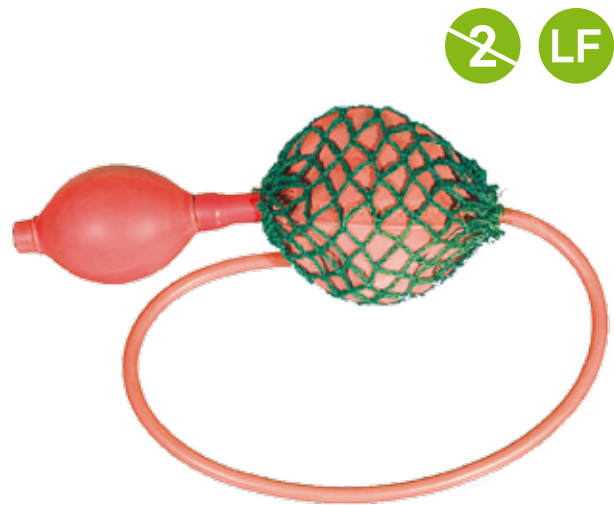

There is only one solution and that is using our Disposable device, arguably the best selling product of its type in Australia and New Zealand.

Because of their design, Sigmoidoscope Insufflation Bellows are notoriously difficult to clean and sterilise, consequently our disposable product is the solution everyone is looking for. Incorporating two valves and cotton net, it works perfectly.

It is safe, disposable and very affordable.

Features

- Disposable bellows
- 2 valves
- Cotton net
- First grade quality
