

### Diathermy Cleaning Brush

CLINIPAK

- A unique stainless brush with a removable “fence” for use in cleaning diathermy forceps. One pack contains two brushes (10mm & 15mm) complete with fences
- The “fences” can be removed and the two brush halves put together to form one brush with two widths
- A novel concept for safe wash room or theatre cleaning of diathermy forceps/bipolar forceps. The simple guard reduces the risk of damage to insulation
- Can be separated for thorough cleaning and autoclaving
